

Vishwakarma Government Engineering College, Chandkheda
Department of Information & Communication Technology

Semester- VI

Microprocessor & Microcontroller --3163207

ALA – Assignment: 1

Course Outcome-1

1	Define following terms: (1) Compiler (2) Interpreter (3) Assembler
2	Define following terms: (1) Mnemonics (2) Instruction (3) Program
3	What is the function of: (1) Program Counter (2) Stack Pointer
4	What is the function of: (1) Address Bus (2) Data Bus (3) Control Bus
5	Define following terms related to 8085 microprocessors: 1) T State 2) Machine Cycle 3) Instruction Cycle
6	What is the difference between high-level programming languages and assembly language?
7	Differentiate with suitable example: Serial processing device and parallel processing device. Based on the discussion explain the importance of size of data bus in any microprocessor.
8	Compare Microprocessors with Microcontroller. Give at least 5 differences.
9	Explain criteria to select a Microcontroller for a specific application.
10	List five different applications of a microcontroller
